

SQL Code

```
1  CREATE TABLE Student (  
2      student_ID INT PRIMARY KEY,  
3      student_Name VARCHAR(100),  
4      Age INT,  
5      Course VARCHAR(100),  
6      Marks INT  
7  );  
8  
9  SHOW TABLES;  
10  
11  DESC Student;  
12  
13  ALTER TABLE Student  
14  ADD Email VARCHAR(100);  
15  
16  ALTER TABLE Student  
17  MODIFY student_Name VARCHAR(150);  
18  
19  
20  ALTER TABLE Student  
21  CHANGE Email Email_ID VARCHAR(100);  
22  
23  ALTER TABLE Student  
24  DROP COLUMN Email_ID;  
25  
26  INSERT INTO Student (student_ID, student_Name, Age, Course, Marks)  
27  VALUES (1, 'Krishna', 19, 'BCA', 100);  
28  
29  INSERT INTO Student (student_ID, student_Name, Age, Course, Marks)  
30  VALUES (2, 'Diganth', 19, 'BCA', 100);  
31  
32  INSERT INTO Student (student_ID, student_Name, Age, Course, Marks)  
33  VALUES (3, 'Sushanth', 19, 'BCA', 100);  
34  
35  SELECT * FROM Student;
```

Output:
